## SUMMARY

I am a dedicated backend developer with a strong foundation in building robust backend systems and REST APIs using Spring Boot. I have also developed proficiency in MySQL, utilizing it as the primary database for my backend projects.

## KEY COMPETENCIES

Java	REST APIs	Docker
Spring Boot	Python	Github
MYSQL	Amazon Web Service( EC2)	

## PROFESSIONAL EXPERIENCE

FEB 2023 - May 2023

### Facet Technology Private Limited - Java Intern

- I took on the challenge of researching and developing a POC for Spring Boot Admin to effectively monitor Spring Boot applications.
- I successfully designed and executed a PoC showcasing the utilization of Keycloak as an authentication server, bolstering the security infrastructure of the applications.
- I played a key role in the development of an innovative Event and Attendance Management system.
- I was responsible for implementing backend functionalities that enabled event creation and management the system allowed users to mark their attendance through a mobile app.

### Freelancing

July 2023- Sep 2023

#### Backend Developer

- Developed a RESTful API using Spring Boot for an NFC payment system, enhancing POS transactions at Chandragiri Hills (<https://www.chandragirihills.com>).
- Designed secure API endpoints optimized for both mobile(POS machine) and web applications(admin portal), ensuring robust and versatile access.
- Managed the entire deployment process, ensuring efficient implementation and seamless integration.

## EDUCATION & CERTIFICATIONS

**Bachelor of Science in Information Technology**  
Presidential Business School, 2021- 2024 (On going)

**High School Degree (+2, Science)**  
Gorkha Secondary, 2019 - 2020 CGPA: **3.75**

**Java Certification**  
Broadway Infosys , 2022

## EXTRACURRICULAR ACTIVITIES

**President, IT Club.** **2022**  
Presidential Business School
